REGISTRATION
±0.1 ft — parcel ring to imagery

— Property line — same geometry as sheet 1
- - - - - Buildable envelope

Aerial imagery — backdrop only, not a measurement source
..... Contour — not shown here · see sheet 1

0 16 33 ft
1" = 44' · SP-48021-34785 · generated 2026-07-28 23:22Z

Derived from public GIS records. Not a boundary survey. Not for legal record. Aerial imagery is an illustrative backdrop, not a measurement source. All dimensions, areas and setbacks come from the parcel geometry on sheet 1; where the imagery and the overlay disagree, sheet 1 governs. Overlay registration to the imagery is approximate to ±0.1 ft. Aerial imagery for visual context only - not a survey. Imagery is the provider's current published basemap; its capture date is not verified. Source: Esri World Imagery - Esri, Maxar, Earthstar Geographics, and the GIS User Community. · Sheet 3 of 3
